1. Section of Legal Medicine, School of Law, University of Camerino, 62032 Camerino, Italy

2. Department of Biomedical Sciences for Health, Università degli Studi di Milano, 20100 Milan, Italy

3. Department of Environment and Health, Italian National Institute of Health, 00161 Rome, Italy

The *EpiWe project (Epigenetics for Women)* investigates how violence against women imprints lasting molecular "scars" on victims' DNA expression, profoundly affecting their health. Using advanced epigenetic analysis, *EpiWe* aims to reveal how trauma-induced DNA modifications contribute to long-term health risks and it seeks to implement innovative precision medicine protocols. In this new multicenter phase, the project invites women from five Italian regions to donate biological samples, enabling researchers to monitor these epigenetic changes over time.

VIOLENCE LEAVES INVISIBLE SCARS

YOU CAN STOP IT. UNCOVER THE PATH TO HEALING
